

FSGF AFRICA
LOOKBOOK

FSGF AFRICA is a Clothing Factory located in Abuja. We create quality apparel for Clothing brands, independent fashion designers, corporate organizations, Private label organizations, and the open market.

Over the years we have been consistent in delivering value to our stakeholders, keeping abreast of current industry-standard measures and a specialized operating system that meets the global standards. This has made us become global competitors as our products match similar qualities with foreign companies.

We currently have a semi-automated 110-assembly line capacity specialized in uniforms, fashion items, workwear, and personal protective gear. Our current production capacity is 25,000 garments and 250,000 facemasks monthly. Our staff strength is over 100 personnel including machinists, Cutters, inline supervisors, inventory supervisors, procurement officers, Content strategists, Admin officers, illustrators, pattern makers, and fashion managers. We

are at phase two of becoming a MANCAP certified factory for apparel and personal protective equipment.

The Fashion Space Garment Factory is also an organization that celebrates homemade products as this has led us to create long-lasting relationships with indigenous SON/ISO certified textile companies that produce woven and non-woven materials.

AISHA ACHONU

FOUNDER

Aisha Abubakar Achonu is a Fashion Entrepreneur and the Founder of Fashion Spaces Garment Factory aka “FSGF Africa”. The garment factory emanated from the drive to create a bridge between fashion startups and their quality finished products.

The trait for providing solutions started at an early age where Mrs. Achonu displayed the gift of filling in the gaps in certain industries; her background in journalism shaped her expertise in terms of branding and storytelling, taking up challenges that were ignored.

In Nigeria, the garment manufacturing sector was not explored due to its discouraging cost of setup and the technical expertise required. Notwithstanding, Mrs. Achonu ventured into this space to support SMEs (Fashion) by manufacturing their products at a low MOQ (minimum order quantity).

Furthermore, through the setup of FSGF Africa, Aisha Achonu has been able to contribute generously to the fashion value chain which consist of; Incubation hub for fashion start ups, business advisory services on sustenable growth, mentoring young creatives, and creating a fair playing ground for all genders.

SIGNATURE
